

MonaLisa Touch®

**A NOVEL LASER**  
*for Gynecologic Health*

# MILLIONS OF WOMEN

MAY BE SUFFERING FROM CHANGES  
IN THEIR GYNECOLOGIC HEALTH.

*but they don't have to*

**YOU DESERVE  
TO FEEL**  
*like yourself again*

MonaLisa Touch

# IT'S OKAY to talk about it

"It" refers to changes in gynecologic health and it happens to many women as they age.

---

## A UNIQUE OPTION for patients

MonaLisa Touch (MLT) is a fractional CO<sub>2</sub> laser that may help with your gynecologic health.

**FOR MILLIONS  
OF WOMEN,  
MONALISA TOUCH  
IS A SIMPLE,  
PROVEN LASER  
FOR GYNECOLOGIC  
HEALTH.**

# A NATURAL OPTION

The MonaLisa Touch procedure is hormone-free and does not expose patients to chemicals.

---

## HOW DOES IT WORK?

The MonaLisa Touch laser delivers energy to tissue. This is followed by the body's natural healing response.

MonaLisa Touch

# WHAT MAKES IT UNIQUE?

Unlike other lasers, the SmartXide Touch, which is used to deliver the MonaLisaTouch procedure, was designed for gynecologic use to meet the needs of OB/GYN patients.

---

## THOUSANDS OF WOMEN *have chosen MonaLisa Touch*

The MonaLisa Touch procedure was first offered globally in 2012 and became available in the US in 2014. You can feel confident knowing that it's a trusted device.

# UTILIZED AND RESPECTED

*by researchers worldwide*

The MonaLisa Touch is a well-studied laser and has been accepted by experts in female pelvic health around the world.

---

*deeper lasing of tissue*  
**WITH UNIQUE  
TECHNOLOGY**

The fractional laser technology within the MonaLisa Touch device has proprietary stacking technology, which is a repetitive firing of the laser with more concentrated energy to target deeper levels of the tissue.

*What should I*  
**EXPECT?**

# NON-SURGICAL

*in the comfort of the office*

The procedure is performed here in our office as a routine outpatient appointment.

---

## A CONVENIENT PROCEDURE

*that fits in your schedule*

The procedure time is less than 5 minutes and can be scheduled at your convenience.

# A SIMPLE PROCEDURE *or a series of them*

A short series of laser sessions may be recommended by your physician.

---

# A WELL-TOLERATED *in-office procedure*

The MonaLisa Touch procedure typically requires no anesthesia.

# MINIMAL DOWNTIME

## *with few side effects*

You can return to normal activities after your laser session but you should refrain from sexual activity for 2- 3 days. Your doctor will determine a post-procedure regimen that is right for you.

## CONTINUE LIVING

### *your life*

Most patients resume their routines within a few days of the procedure and side effects are typically mild or unnoticeable in most cases. For a full list of warnings and indications, please see page 20 or visit [smilemonalisa.com](http://smilemonalisa.com).

MonaLisa Touch

frequently asked

# QUESTIONS

# HOW LONG

*until I can have sex?*

It may be recommended that you wait ~2-3 days for any contact in the lased area. Talk with your physician post-procedure.

---

*how long*

## WILL IT LAST?

Everyone is unique and our skin ages pre and post-procedure. You and your physician should discuss your needs and expectations.

**BOOK AN  
APPOINTMENT  
TODAY**

*you're worth it!*

# important TO NOTE:

Like all medical procedures, not all patients are suitable for the procedure. Talk to your medical provider who will review the risks and benefits of this procedure with you.

## **Indications**

The SmartXide Touch Laser (MonaLisa Touch) is indicated for incision, excision, ablation, vaporization and coagulation of body soft tissues in medical specialties including aesthetic (dermatology and plastic surgery), podiatry, otolaryngology (ENT), gynecology, neurosurgery, orthopedics, general and thoracic surgery (including open and endoscopic), dental and oral surgery and genitourinary surgery. Use with scanning unit is indicated for ablative skin resurfacing.

## **Contraindications**

SmartXide Touch Laser is contraindicated for those patients who:

- Have vaginal, cervical, or other lesions in the target area that have not been evaluated and diagnosed
- Have active vaginal or vulvar infection i.e., (herpes, candida, STDs)
- Pregnant or within 3 months postpartum
- Have vaginal prolapse beyond hymen
- Have history of radiation to vaginal/ colo-rectal tissue
- Have history of reconstructive pelvic surgery with "mesh kits"
- Have a history of impaired wound healing
- Have a history of keloid formation
- Known anticoagulation treatment or thromboembolic condition
- NOTE: A qualified practitioner is solely responsible for evaluating each subject's suitability to undergo a laser procedure and for informing those being lased about any risks involved with the procedure, pre-and postoperative care, and any other relevant information.

## **Warnings and Cautions**

- WARNING: The SmartXide Touch Laser can cause eye injury. Never use this device without protective eyewear.
- CAUTION: Use of controls, adjustments, or performance of procedures other than those specified herein may result in hazardous radiation exposure. To avoid these hazards, the precautions described in the Operator's Manual must be observed when installing, operating, moving or servicing the system.
- CAUTION: Since the Probe, Ring, and Handpiece may become contaminated with blood, fluids or human tissue, they must be cleaned and disinfected /sterilized after every treatment.
- CAUTION: Laser plume or smoke produced by the laser beam may contain live tissue. Use of a smoke evacuator is advised if plume is present.
- CAUTION: Exceeding the Smart Stack recommended maximum setting increases the risk of collateral thermal injury and increases wound healing time.

## **Side Effects**

- Possible side effects may include: Spotting, mild vaginal bleeding, pink or brown vaginal discharge, mild to profuse watery vaginal discharge, redness, swelling, inflammation, tenderness, itching, irritation, burning upon urination, pinpoint bleeding and discomfort.
